

MEDICAL INSTITUTES

Medical institutes and medi spas

More and more dermatologists and plastic surgeons are offering spa therapies and medical services like in day spas or beauty institutes.

After a Botox, various laser treatments, fillers, dermabrasion and deep peeling, a great range of regenerating treatment products such as the Valmont collagen mask complete the non-invasive medical spa treatments.

Frontiers tend to be blurred between medical institutes and hotels which also provide medical spa consulting services in some cases.

Medical institutes follow a results-driven approach and thus skin-firming, body-slimming, wrinkle-diminishing, glow and radiance are expected from treatments and products.

Thanks to its Swiss clinic medical background Valmont offers the most advanced anti-age treatments along with high-end medical spa consulting, for immediate and long-lasting results.

ORLOFF trains beauticians on Valmont treatment products so as to meet the most sophisticated expectations of its demanding clientele while at the same time offering a professional approach on beauty much appreciated by doctors.
